EXAMINATIONS COUNCIL OF ZAMBIA

Examination for General Certificate of Education Ordinary Level

Mathematics

4024/1

Paper 1

2020

Candidates answer on the question paper

Additional materials:

Geometrical instruments

Time: 2 hours

Marks: 80

Instructions to Candidates

- 1 Write the centre number and your examination number on every page of this question paper.
- 2 There are twenty-three questions in this paper.
- 3 Answer all questions.
- 4 Write your answers in the spaces provided on the question paper.
- 5 If working is needed for any question, it must be shown in the space below that question.
- 6 Electronic calculators and mathematical tables should not be used in this paper.
- 7 Omission of essential working will result in loss of marks.

Information for Candidates

- 1 No paper for rough work is to be provided.
- 2 Omission of essential working will result in loss of marks.
- 3 The number of marks is given in brackets [] at the end of each question or part question.
- 4 Cell phones are not allowed in the examination room.

For Examiner's Use

For
Examiner's
use

- 1 Simplify $2a + (b - a) - 2b$.

Answer: [2]

- 2 Evaluate $\left(\frac{64}{125}\right)^{\frac{1}{3}}$.

Answer: [2]

www.eczpastpapers.com

- 3 Given that the lines $3y = x + 6$ and $y = kx + 12$ are perpendicular, find the value of k .

Answer: [2]

Centre Number				Examination Number													

- 4 Factorise completely $6ax - 4ay - 3bx + 2by$.

Answer: [2]

- 5 Given that A is the point $(-2, 1)$ and B is the point $(1, 5)$, find $|\vec{AB}|$.

www.eczpastpapers.com

Answer: $|\vec{AB}| =$ [2]

Examiner's
use

- 6 Use set notation to describe the shaded region in the diagram below.

Answer:

Answer: [2]

- 7 Given that $A = \begin{pmatrix} 2 & 3 \\ 1 & 0 \end{pmatrix}$, $B = \begin{pmatrix} -1 & 0 \\ x & 2 \end{pmatrix}$ and $C = \begin{pmatrix} 7 & 6 \\ -1 & 0 \end{pmatrix}$,

find

(a) C^T ,

(b) x for which $AB = C$.

www.eczpastpapers.com

Answer: (a) [1]

(b) $x =$ [2]

Centre Number				Examination Number									

- 8 Given that the 11th term of an arithmetic progression is 43 and that the first term is 3, find the
- (a) common difference,
 - (b) 4th term.

Answer: (a) [2]

(b) [1]

-
- 9 (a) A plane flying at a speed of 900 knots takes 5 hours to fly from town A to town B. Calculate the distance between the two towns.
- (b) Point Q on longitude 85°E lies on the equator and is due east of P. The time difference between P and Q is 5 hours. Calculate the longitude on which P lies.

Answer: (a) [1]

(b) [2]

Examiner's
use

- 10 (a) The probability of a girl not wearing a neck tie is 0.55. What is the probability that the same girl will wear a neck tie?
- (b) Given that $8^{x-1} = 16$, find the value of x .

Answer: (a) [1]

(b) $x =$ [2]

- 11 (a) Given that $S = \{x: 1 < x \leq 15, x \text{ is a prime number}\}$, list the elements of set S .
- (b) The diagram below shows a right square pyramid $ABCDE$ of base 6cm and $EF = 5\text{cm}$.

Calculate the total surface area of the triangular faces of the pyramid.

Answer: (a) [1]

(b) [2]

Centre Number				Examination Number									

12 A function f is defined by $f(x) = 2x - 5$.

Find

- (a) $f^{-1}(x)$,
- (b) $ff^{-1}(2)$,
- (c) the value of x if $ff(x) = x$.

www.eczpastpapers.com

Answer: (a) [1]
 (b) [1]
 (c) [2]

Examiner's
use

- 13 (a) The diagram below shows two figures P and Q on the XOY plane.

Describe fully the single transformation that maps P onto Q.

- (b) Given that $y = 2x^3 - \frac{4}{x^2}$, find $\frac{dy}{dx}$.

www.eczpastpapers.com

Answer: (a)

..... [2]

(b) [2]

Centre Number	Examination Number

- 14 The diagram below shows three points O, A and B in which $OB = AB$.

Given that the bearing of A from O is 030° and angle $ABO = 40^\circ$, calculate the bearing of

- (a) B from A,
(b) O from B.

www.eczpastpapers.com

Answer: (a) [2]

(b) [2]

- 15 The values of x and y are given to 1 decimal place as $x = 4.2$ and $y = 7.3$. Find the

- (a) maximum value of $x + y$,
(b) minimum value of $x - y$.

Answer: (a) max. $x + y =$ [2]

(b) min. $x - y =$ [2]

Examiner's
use

- 16 It is given that y varies inversely as the square of x . The table below shows some values of x and corresponding values of y .

x	2	b	6
y	9	4	a

Find the

- (a) value of k , the constant of variation,
- (b) value of a ,
- (c) values of b .

www.eczpastpapers.com

Answer: (a) $k = \dots\dots\dots$ [1]

(b) $a = \dots\dots\dots$ [1]

(c) $b = \dots\dots\dots$ or $\dots\dots\dots$ [2]

Centre Number	Examination Number											

- 17 In the diagram below, A, B, C, and D lie on the circumference of the circle, centre O.

Given that $\angle BAD = 47^\circ$ and $\angle DBC = 28^\circ$,
calculate

- (a) $\angle BOD$,
- (b) $\angle OBD$,
- (b) $\angle BDC$.

www.eczpastpapers.com

- Answer:
- (a) $\angle BOD = \dots\dots\dots$ [1]
 - (b) $\angle OBD = \dots\dots\dots$ [1]
 - (c) $\angle BDC = \dots\dots\dots$ [2]

Examiner's
use

- 18 (a) The diagram below shows a right angled triangle PQR.

Given that $PQ = 15$ cm and $\cos x^\circ = \frac{2}{3}$, calculate the length of QR.

- (b) A straight line L has equation $3y = 5x - 6$. Find the y co-ordinate of the point where L cuts the y -axis.

www.eczpastpapers.com

Answer: (a) [2]

(b) [2]

- 19 (a) Rectangle ABCD and DAEF are geometrically similar.

Given that $AB = 10$ cm and $AD = 4$ cm, calculate the area of rectangle DAEF.

- (b) Mrs Kalomba bought 120 shares at a nominal value of K40.00 each which she later sold at K42.50 each. Find her profit.

22 (a) Solve the equation $x^2 - 7x = 8$.

(b) The diagram below is the graph of $y = -4\left(x - \frac{1}{2}\right)^2 + 9$.

Find the

- (i) x coordinates of A and B,
- (ii) coordinates of C.

www.eczpastpapers.com

Answer: (a) or [2]

(b) (i) and [2]

(ii) [2]

- 23 A sprinter runs a race of 200m. Her total time for running the race is 25 seconds ending at U m/s. Below is a sketch of the motion of the sprinter.

Calculate the

- acceleration in the first 4 seconds,
- distance covered in the first 20 seconds,
- value of U .

www.eczpastpapers.com

Answer: (a) $a = \dots\dots\dots$ [1]
 (b) $\dots\dots\dots$ [2]
 (c) $U = \dots\dots\dots$ [3]
